

how to refer

To refer a patient, please complete and return one of the enclosed forms, or contact us by phone or e-mail.

Alternatively, please feel free to call Mark Worthing for an informal chat on the implant referral services provided by Tupsley Dental Practice.

Be it the services we provide, the way we clearly explain treatment procedures, or in the environment we have created, Tupsley Dental Practice is all about giving you and your patients plenty to smile about.

103 Ledbury Road
Tupsley
Hereford
HR1 1RQ
Telephone: 01432 267388

Opening hours – Monday to Friday 9am to 5.30pm.

a refreshing approach

INTRODUCTION

an implant referral service
to **exceed** expectations

When you refer one of your patients for dental implant treatment, we appreciate that you are expecting:

- A partnership approach to your patient's treatment
- Exceptional standards of service
- The highest quality surgery, functionality and cosmetic results
- An understanding that your patients will return to your practice after the completion of any implant treatment

This is the approach taken by Tupsley Dental Practice, and it is one which is winning us many friends within the dental profession – as well as delighting patients throughout Hereford, Worcester, the Marches, Welsh borders – and beyond.

Since 1998 we have been successfully using Brånemark System® dental implants – the first and, in our opinion, still the best implants on the market.

As one of the most reliable and permanent solutions to missing teeth, or uncomfortable dentures, dental implants look, feel and function just like natural teeth.

Dental implants can be used to replace any teeth in the dental arch, as well as being suitable for total reconstructions and overdentures.

the **services** we provide

- Patient consultation to ascertain suitability for implant treatment (alternatively, an opinion can be given by studying models and radiographs supplied by the referring dentist)
- Comprehensive treatment planning
- Implant placement and restoration
- Attentive monitoring and reporting - before, during and after treatment
- All implant treatment undertaken by Mark Worthing

Mark Worthing

BDS (Wales),
FDS RCS (Eng)
GDC No. 69821

Mark qualified from the University of Wales College of Medicine as a Dental

Surgeon in January 1994. He also spent two years in hospital practice in South Wales and a year in general practice in Cardiff, prior to returning to Hereford in February 1997 to join his father.

In addition, Mark has obtained a surgically-based Fellowship from the Royal College of Surgeons of England and attended courses in Dublin, Sheffield, Marseille and the University of Leuven in Belgium. His special interest is dental implants, which he has been placing and restoring since 1998.
