

AESTHETICALLY PLEASING

Tupsley Dental Practice welcomes Beautoxology

Tupsley Dental Practice, located at the top of Aylestone Hill in Hereford, is welcoming Dee Hadley the owner of Beautoxology to provide facial aesthetics and non-surgical cosmetic procedures.

Tupsley Dental Practice owners Mark Worthing and Rob Masters explain: “We continue to offer our patients the best care we can and to the highest standard possible, but we are also aware of the changing desires of our patients and society in general.

“For some time we have wanted to be able to offer our patients a full list of cosmetic procedures provided by experienced professionals, in a safe environment. Dee Hadley and her colleagues at Beautoxology definitely meet that requirement.”

Beautoxology are a dynamic and forward-thinking team of clinicians that specialize in non-surgical medical procedures to enhance and rejuvenate the face and body.

The procedures will be carried out by Dee Hadley and Angela Garside both of whom have undertaken further advanced training in medical aesthetics, and Dee is a respected lecturer in the cosmetic field. Their company ethos prides itself on achieving the highest standards in non-surgical cosmetic procedures, by incorporating the latest evidence-based research into clinical care.

‘We continue to offer our patients the best care we can and to the highest standard possible...’

The team explain, “As we are all aware, the ageing process is unpredictable and affects people differently. While our team of experts offer the best in evidenced based practice, clinical expertise and up-to-the-minute technology, our focus is not primarily on anti-ageing. Eradicating lines and wrinkles in isolation can lead to an unnatural look. This is why at Beautoxology we have a multi-dimensional strategy that also takes into account facial beautification, balance and harmony.”

The team at Beautoxology has outstanding technical ability, having been trained and mentored by some of the industry’s world leaders within the field of cosmetic medicine. “This means that we use the latest research-based techniques and products to lift, volumise and shape the face. This ensures absolutely minimal recovery time and virtually no side effects, so that you can return to your day to day life with little fuss and great results.

“We also offer an inclusive and comprehensive aftercare service, which is perhaps why Beautoxology has the most sought after practitioners and is one of the UKs fastest growing aesthetic companies.”
